WHAT DOES THE PLATFORM DO?

THIS ALL-IN-ONE TOOL DELIVERS RICH ONLINE LEARNING ACTIVITIES IN AN ENGAGING MANNER.
THE PLATFORM:

Revolutionises the way people learn

This flexible platform allows participants to access all of their learning activities, any time, anywhere (you just need internet access). Transform your learning culture and empower your people to take control of their learning.

Gets more from your existing conferencing systems

The vLearning platform integrates with your favourite online meeting system and leverages its full potential by aligning live sessions with supporting materials and activities that can be accessed outside of the live session itself.

Achieves rapid skill deployment

Designed to allow you to quickly and easily design engaging learning, you can incorporate anything from live sessions and videos to SCORM eLearning and downloads. All instantly deployed without the need of software installation.

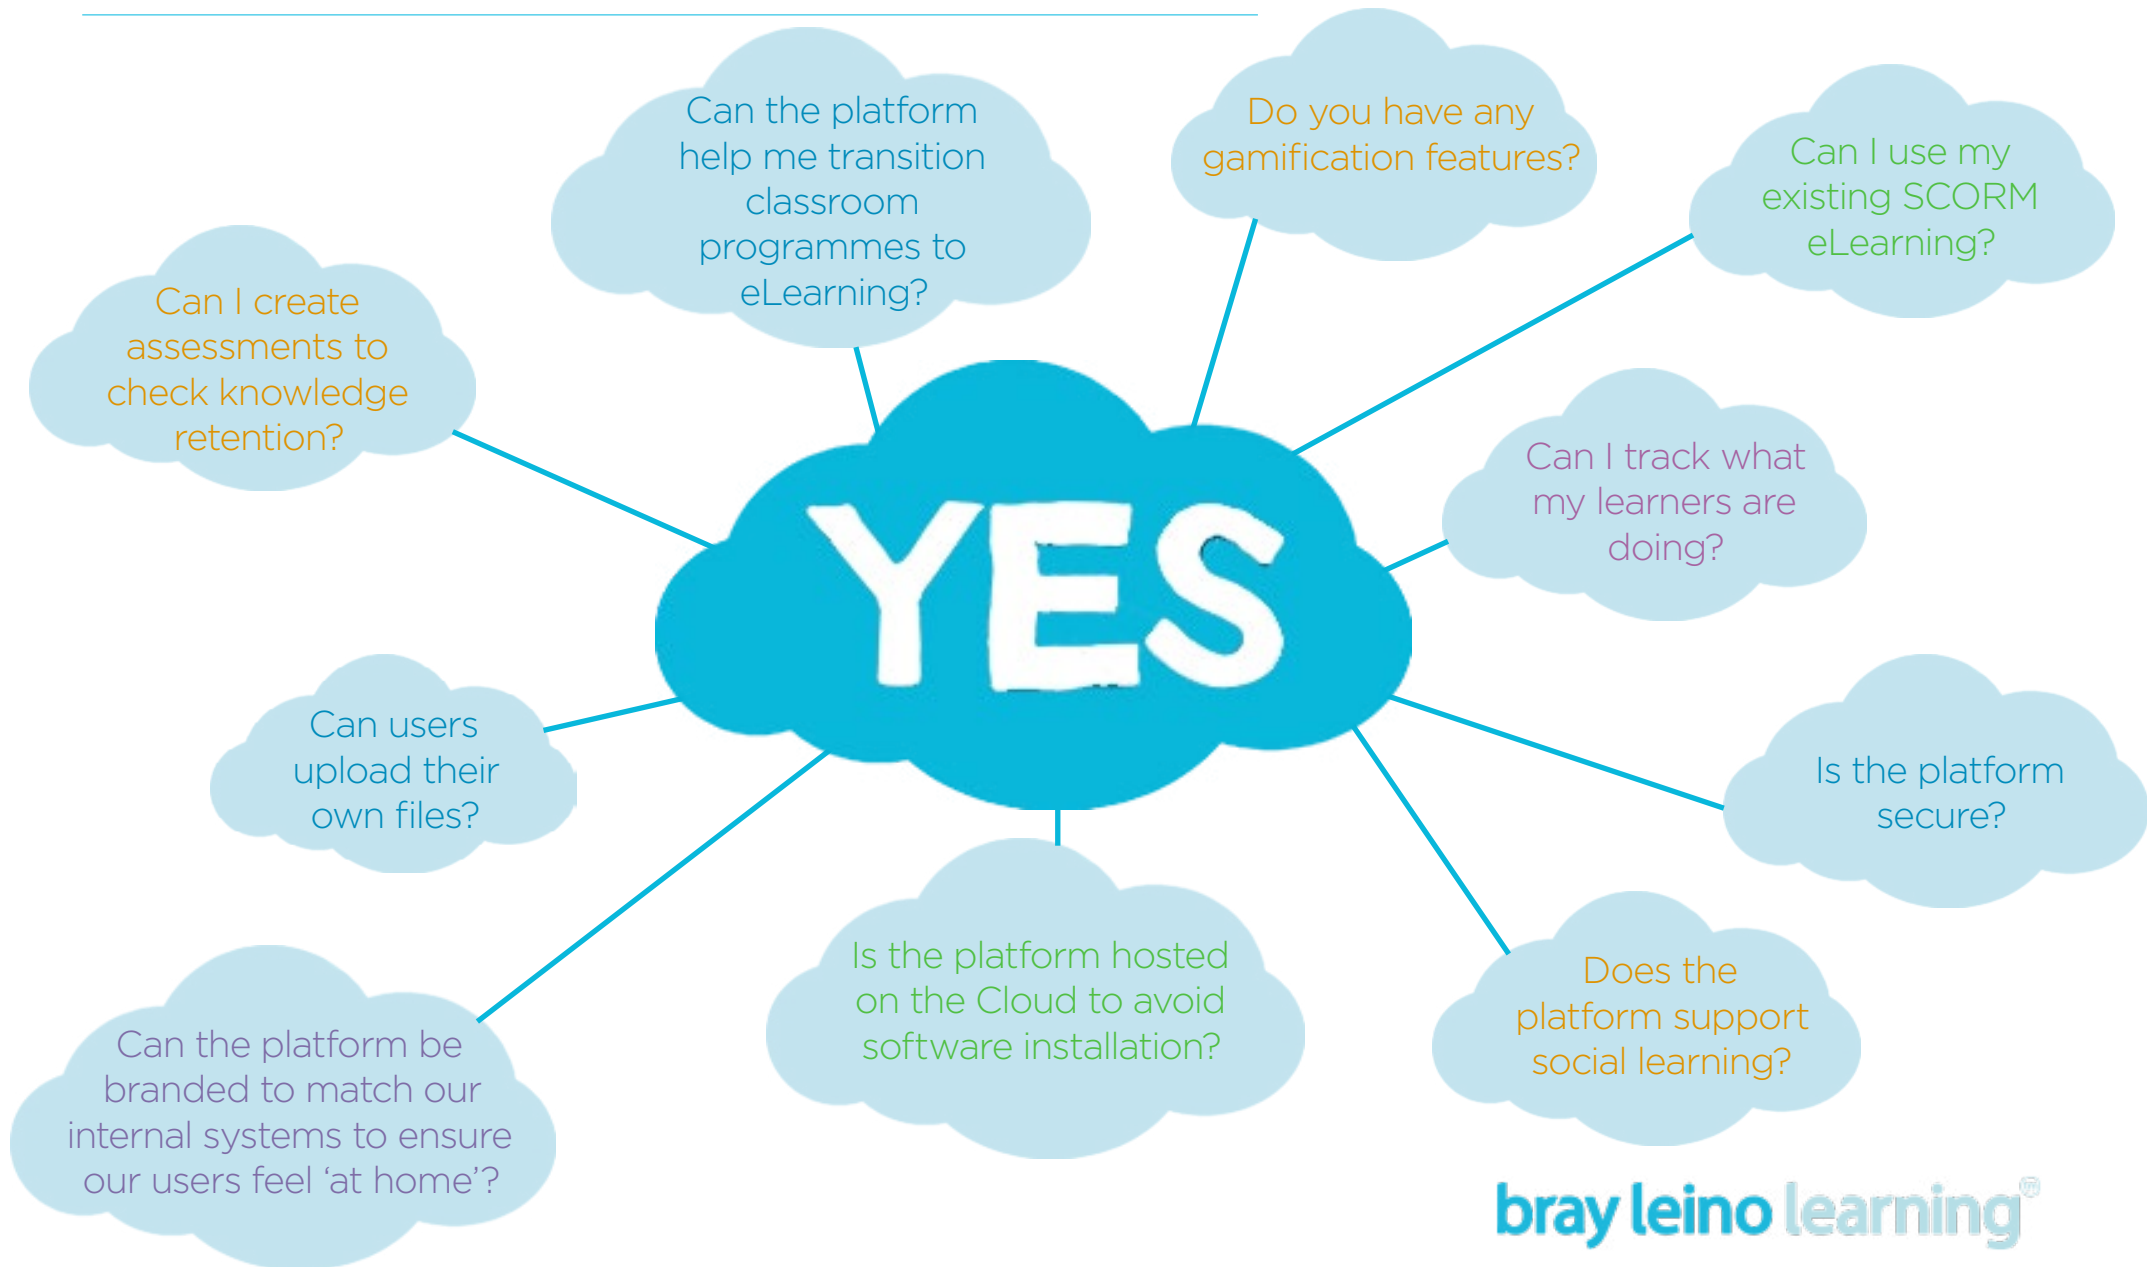

Makes the administration process easy

Set-up, scheduling, registration, joining instructions, reminders and attendee management are all incorporated for quick, efficient administration. We even have a simple tool to automate recording of sessions.
